SUMMARY

Unity live-ops and gameplay engineer with 4+ years building mobile games in C#. At Dot9 Games, builds league, clan, party, tournament, reward and A/B-testing client systems for a live multiplayer FPS and a social games hub. Earlier shipped a Ludo-style board game, a bilingual story-puzzle game, and a solo 2D physics platformer run live with Firebase.

SKILLS

Engine and code: Unity (2022 LTS, Unity 6), C#, ScriptableObjects, Addressables, UniTask
Multiplayer and live-ops: Photon PUN, leagues, clans and tournaments, reward systems, remote config and A/B testing (client side), Firebase
Graphics: Shader Graph, particle systems, animation, 2D and 3D lighting, Frame Debugger
Tools: Git, Mantis, Android App Bundle builds, Arabic and Hindi localization

EXPERIENCE

Game Developer, Dot9 Games

Apr 2025 to Present · Mumbai, India

FAU-G: Domination, Competitive Multiplayer FPS · team of 12 developers, 10 artists, 4 testers

- Built the client for the FAU-G Bharat League (FBL), a weekly league that led to two offline e-sports season finals, covering its flow, league transitions and failure-handling UI.
- Developed clans and the Teams party mode: match leadership, party matchmaking and team chat.
- Engineered the multiplayer connection and matchmaking layer on Photon, including region selection, match restarts and matchmaking fixes.
- Created the tournament system for a live finals event.
- Rewrote the multi-reward grant logic and built the reward UI for skins, accessories and multi-item rewards.
- Led the battle-streak feature with one junior developer, designing the system and building the streak logic, flow and most of the UI.
- Designed and built the targeted announcement system end to end, from client calls to logic to UI.
- Set up the client side of remote configuration and A/B testing so the team could compare features and rewards.
- Integrated ads, in-app review prompts and analytics.
- Added player and chat reporting and username validation.
- Diagnosed and fixed a rendering overdraw issue using the Frame Debugger.

Chapter 26: Casual Multiplayer Games & Social App · team of 9 developers, 5 artists

- Worked on the client for a mini-game hub covering social features, tournaments, leaderboards, achievements, daily tasks, rewards and a store, released in Jul 2026.
- Implemented the clan client: member management, requests, invites and search.
- Wrote the tournament and leaderboard screens and flows against the backend API.
- Delivered Arabic localization and right-to-left layouts across the hub, store and clan screens.
- Added a QR scanner and generator for check-ins and a live-cast page; fixed bugs across the Carrom, Blink, Ludo and football penalty minigames.

Junior Game Developer (promoted from Intern), BoredLeaders Pvt. Ltd Feb 2023 to Dec 2024 · Delhi, India

- Handled lighting, particle systems and animations across the Mahabharat games, working with ready-made art assets.

Mahabharat Board Game: Ludo-Style Strategy Game · team of 3 developers, 2 artists

- Developed a Ludo-style strategy board game with 2 and 3 player bot matches, 7 battlefields with day and night variants, several board layouts, 25 power-ups, and rewind and reroll turns.
- Created the bot opponents and tuned their difficulty and the power-ups using automated test runs.
- Delivered the meta-game and services: XP, achievements, daily missions, loot chests, challenge modes and a guided tutorial, plus sign-in, leaderboards, ads, in-app purchases and push notifications.

Puzzles of Mahabharat: Bilingual Story-Puzzle Game · sole developer, 1 artist

- Engineered a bilingual (English and Hindi) narrated story-puzzle game with 375+ story pages, 126 image puzzles and 50 jigsaws, on a data-driven content pipeline.
- Wrote 10 puzzle types (rotation, grid, hexagon, circle, hybrid and more), Hindi font support, and runtime language switching with voice-over in both languages.
- Implemented sign-in and cloud save across devices, plus ads, in-app purchases, achievements, leaderboards and Android App Bundle builds.

Indie Game Developer, Immersiveorama 2022 to 2023, updates to Feb 2026 · Mumbai, India

Steady Light: Solo 2D Physics Platformer (Unity 6)

- Solo-developed the game and published it on the Play Store in Oct 2022 (originally released as LightForce), now at 590 installs and a 4.5 rating: about 45 levels across 6 worlds, a library of about 30 reusable obstacle components, touch controls on the new Input System.
- Architected it for fast content: ScriptableObject event channels, a custom reflection-based dependency injector, and Addressables-streamed levels defined as data.
- Ran it as a live game, with updates through Feb 2026: Firebase Remote Config for balance changes without app updates, and Firebase Analytics with per-level timing.
- Handled the rest solo, from a tamper-detecting save system (SHA-256), async UI sequencing (UniTask) and custom Shader Graph shaders to 2D lighting and animation, using purchased art and VFX packs.
- Self-taught Unity during the 2020 lockdown after a VFX role ended; published a first game in Oct 2020 (since removed from the Play Store) before building Steady Light.

VFX Artist, Cinegence Media Pvt. Ltd Aug 2019 to 2020

- Started as a clean-up artist and moved up to compositor in post-production on feature films, including Toofan, 83 and Baaghi 3.
- Delivered VFX shots under tight deadlines, compositing in Nuke and working with animators to keep scenes consistent.

SHIPPED TITLES

 **FAU-G: Domination** Dot9 Games · Android, iOS  **Chapter 26** Dot9 Games · Android, iOS

 **Mahabharat Board Game** BoredLeaders · Android  **Puzzles of Mahabharat** BoredLeaders · Android

 **Steady Light** Immersiveorama · Android

EDUCATION

Bachelor of Commerce, Thakur College of Science and Commerce, Mumbai · 2015 to 2018

CERTIFICATIONS

Multiplayer in Unity with NGO, Shader Graphs for Effects, VFX for Movies (Prime Focus), plus short Unity programming courses on clean code, MVC and OOP
